

K102P: PanelPC for Fitness Equipment

This Panel PC features reliability and durability, plus the ability to carry customer-specific branding. The current product serves as the multi-function display featured on a new line of fitness equipment, but it would be appropriate wherever a high-end touch screen Panel PC is needed.

Performance Characteristics

Projected capacitive touch display PC allows multi-touch gesturing. System uses COTS components and Intel® Atom™ processor. Ruggedized construction assures trouble-free performance under rough conditions.

Ergonomics:

15.6" (396mm) embedded touch display.

Lifecycle:

Five-year availability.

K102P

EmbedTek designs, invents, and manufactures computers, software, sensors, cameras, and displays for original equipment manufacturers. Our systems improve the quality of imaging in healthcare, simulation programs in the military, video analytics in security, and much more. Throw any challenge at us, from demanding environment and ergonomic requirements to High Level Assembly and nonstandard I/O. We'll evaluate it, carefully attack it, and solve it.
